PID STATION LC: HIGH PURITY NITROGEN & ZERO AIR GENERATORS WITH ON BOARD COMPRESSOR

N₂ + AIR

APPLICATIONS

- ✓ Make up gas, GC-FID
- ✓ Carrier gas for GC

DESCRIPTION

LEMAN-INSTRUMENTS designed the **PID STATION LC** product line of **High Purity Nitrogen & Zero Air generators with compressor** to supply independently N₂ & AIR for GC-FID, carrier gas for GC, close to the consumer in an elegant casing with full color display and touchscreen.

The PID Station is composed of a High Purity Nitrogen Generator, a Zero Air generator and an oil free piston AIR compressor.

Each gas, N₂ and AIR, is dried and purified or extracted by the Pressure Swing Adsorption (PSA) technology. N₂ & AIR output pressures are regulated from 0.5 to 5 bar.

Gases are available 24/7 with constant purity.

Each instrument is equipped with high performance communication interfaces USB, RS485 & Ethernet as standard, (WLAN as options) to create a very flexible gas network with local or central control.

Due to the software being focused on safety, automatic regulation and reliable communications, the **PID STATION LC** is easy to install, reliable, safe and pleasant to operate.

BENEFITS

- ✓ Reduces in operation costs. Return on investment within 15 months.
- ✓ Improves resolution and detection limit versus Helium only usage. Provides High pressure stability.
- ✓ N₂ and Zero Air available 24/7 at constant purity. No contamination.
- ✓ Independent source of Nitrogen and Zero Air that does not require any piping and can be easily moved around the laboratory. Remote control from PC, I-phone and tablet
- ✓ Low noise compressor
- ✓ Very safe operation, internal leak-test, automatic shut-down, over-pressure valve, current and voltage limits.
- ✓ No handling and storage of cumbersome gas cylinders. No cylinder rental fee.
- ✓ Long life compressor with power economy function.
