DURAG GROUP

LaserCEM®

Multigas analyzer

Features

- Continuous multigas measurement
- High resolution IR laser technology
- Patented OFCEAS TDL technology
- No optical moving parts
- Certified measuring ranges for CO, NO, SO₂, HCl, NH₃, H₂O, O₂ fulfil IED requirements for WI + LCP
- Smallest certified measuring range for NO 0–78 mg/Nm³
- Direct measurement without modifying the sample
- Patented low pressure sampling system
- Low instrument air consumption

Benefits

- Multigas measurement without interferences regardless of the matrix
- Self-calibrating system
- Measurement in very wet conditions (up to 80% vol H₂O)
- Zero information contained in the signal (no zero gas required)
- Suitable for NOx ELV below 35 mg/Nm³ (WI)/50 mg/Nm³ (LCP)
- Very fast response time
- Reduced operational costs (low compressed air + low power consumption due to self heated line @ 80 °C)
- High availability of the system
